

MAHAMADOU MOUSSA ISMAEL

FULL STACK WEB DEVELOPER

Adresse : Niamey, Niger Telephone : +22796900473

• Address e-mail : maitre.imms@gmail.com

• LinkedIn profile : www.linkedin.com/in/mahamadou-moussa-ismael-516798252

• GitHub profile : <https://github.com/CS-IMMS>

I am a passionate and versatile web developer, with a solid foundation in full stack development. I have acquired programming skills through my studies and personal projects, and I am always eager to update myself with the latest technologies and development practices. I am able to work alone or in a team, and I look forward to putting my skills into practice in a professional work environment.

EXPERIMENT

20/10/2022 – TO DATE

BACKEND DEVELOPER, CODELOCCOL

At the end of my studies at the Codeloccol code school, I participate in an end-of-year project in a team, composed of 5 developers, a security manager and a project manager. My role in this team is to manage the backend of the project with NestJS and TypeScript.

5/6/2022 – 30/6/2022

FRONTEND DEVELOPER, KAMAMINI

In order to improve the user experience of the Kamamini platform, I joined a team of 3 frontend developers. I was in charge of the realization of the user profiles dashboard with ReactJS and the validation of the contact forms with NodeJS and the Nodemailer module for sending emails.

9/5/2021– 15/8/2021

STAGIAIRE, YAYI MAKE

After training in modeling and 3D printing, I benefited from an internship at the startup YAYI MAKE, where I held the position of printing supervisor, especially for protective visors.

FORMATION

from 17/01/2022 to present

FULL STACK WEB DEVELOPMENT CERTIFICATION, CODELOCCOL

I trained as a full stack (MERN stack) and mobile (ReactNative) web developer. This training included courses and projects on the following technologies: HTML, CSS, JavaScript, as well as the Bootstrap and Materialize frameworks for frontend development, and ReactJS and NodeJS for backend development, with MongoDB as the database. I also learned how to use noCode tools like Wordpress as well as design tools like Figma.

from 20/07/2022 to 5/10/2022

NANODEGREE DEVELOPER WEB FULL STACK, UDACITY, ALX-T

Thanks to a scholarship offered by the ALX group in partnership with Udacity, I benefited from training in full stack web development with the Python language and the Flask framework. I learned how to structure and model a relational database with Flask and SQLAlchemy, connect to a PostgreSQL database, develop and document a REST API, and manage access and identities (with Auth0). I also learned how to containerize and deploy and deploy a server on Kubernetes using EKS.

SKILLS

- Frontend : ReactJs (good), TypeScript(good)
- Backend : NodeJs (bon), Python-Flask(good)
- No Code : WordPress, Adalo
- Design UI/UX : Figma (good)
- CI/CD : GitHub, Kubernetes and Docker

SOFT SKILLS

- Communication
- Teamwork
- Problem solving
- Continuous learning
- Autonomy and time management
- Adaptability

LANGUAGES

- Français (good)
- Anglais (Medium)
- Haoussa (good)
- Zarma (Medium)
